Top Trending Section

- This Section Shows Trending Songs with Their Images
- Stay up to date: Keep track of the latest music trends and update your trending song section regularly. You can use music charts, social media, and other sources to stay informed.
- Highlight a variety of genres: Your audience may have diverse music preferences, so try to include a variety of genres in your trending song section. This will keep your content interesting and relevant to a broader audience.

Landing Page

User And ADMIN Login Form

A login page is an essential part of many websites, as it allows users to securely access their accounts and personalized content. When designing My login page, there are several key elements to consider:

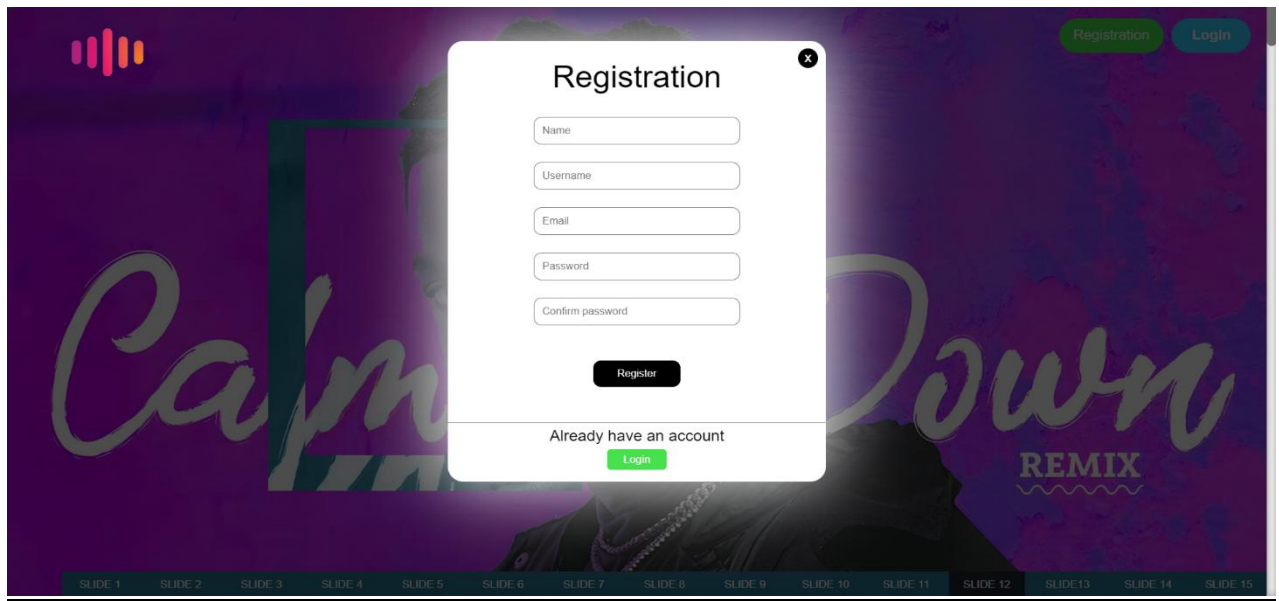

Simple and User-Friendly Design: The login page should have a clean and simple design that is easy for users to navigate. Avoid cluttering the page with too many elements or distractions and use a clear and readable font.

This login form that allows both user and admin access is a convenient way to manage access to

manage their accounts.

Landing Page

User Registration Form

The image shows a user registration form overlay on a purple background. The background features a person's face and the text "Calm Down REMIX". The registration form is titled "Registration" and includes the following fields: Name, Username, Email, Password, and Confirm password. There is a "Register" button and a "Login" button. The form also has a link for "Already have an account". At the bottom of the slide, there is a navigation bar with 15 slides labeled "SLIDE 1" through "SLIDE 15".

Having a user registration form is an important part of building a website that allows users to create their own accounts.

A registration form should be simple and straightforward, with only essential fields. Avoid cluttering the page with too much information, which can be overwhelming and discouraging for users.

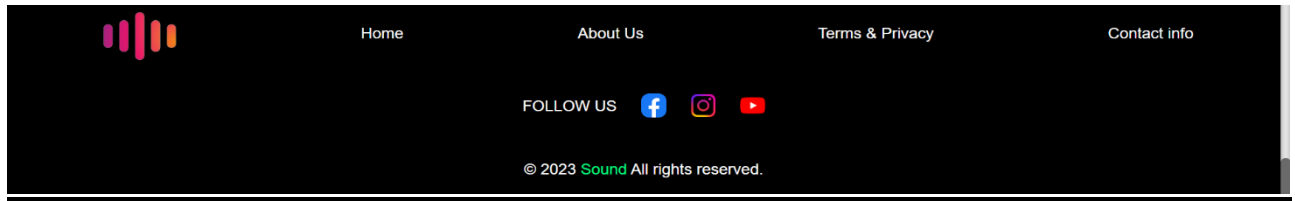

User Registration Form Users Register Them Self and Enjoy Website Content

A user registration form allows users to create an

account on your website, giving them access to exclusive content and features.

Landing Page

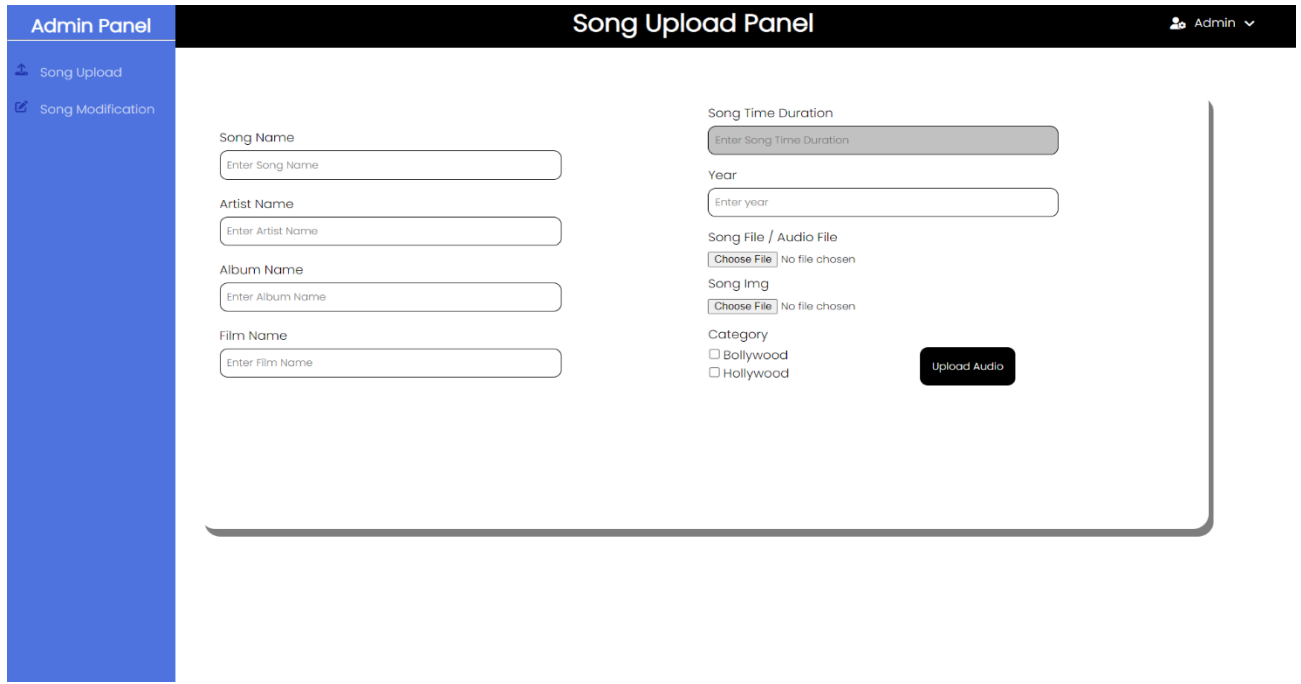

Footer

- Having a footer with links to important pages is an important part of creating a user-friendly website. A footer should be simple and straightforward, with only essential links.
- Include key information in the footer, such as the Website logo, links to the home page, about us page, terms, and privacy page, and contact us page.
- Clear and descriptive labels for each link, such as "About Us" and "Contact Us". This will help users understand what each link leads to.

Admin Page

Admin Main Page

The screenshot displays the 'Admin Main Page' for the 'Song Upload Panel'. The interface features a dark blue sidebar on the left with the 'Admin Panel' header and two menu items: 'Song Upload' (with a plus icon) and 'Song Modification' (with a checkmark icon). The main content area has a black header bar with 'Song Upload Panel' and a user profile 'Admin' with a dropdown arrow. The form is organized into two columns. The left column contains four text input fields: 'Song Name' (placeholder: 'Enter Song Name'), 'Artist Name' (placeholder: 'Enter Artist Name'), 'Album Name' (placeholder: 'Enter Album Name'), and 'Film Name' (placeholder: 'Enter Film Name'). The right column contains three more input fields: 'Song Time Duration' (placeholder: 'Enter Song Time Duration'), 'Year' (placeholder: 'Enter year'), and 'Song File / Audio File' (with a 'Choose File' button and 'No file chosen' text). Below these are 'Song Img' (with a 'Choose File' button and 'No file chosen' text) and a 'Category' section with two radio buttons: 'Bollywood' and 'Hollywood'. A black 'Upload Audio' button is positioned at the bottom right of the form area.

- Website Has an admin page Which is important for managing and controlling the website's content and features.
- The website admin page has added new songs and updated uploaded songs and deleted songs.
- When adding a new song, the admin has clear fields for the song's title, artist, genre, release date, and other important information. admin can also include a file upload field for the song itself,

ensuring that it is added to the website's music library.

Admin Page

Song Update Form

The screenshot shows the 'Song Modification' form within the 'Admin Panel'. The form is divided into two main sections: a left sidebar with navigation links ('Song Upload' and 'Song Modification') and a main content area. The main content area contains several input fields for song details: 'Song Name' (TITLE TRACK SONG - BHOOL BHULAIYAA 2), 'Song Time Duration' (3:31), 'Artist Name' (Neeraj Shridhar), 'Year' (2022), 'Album Name' (BHOOL BHULAIYAA 2), and 'Film Name' (BHOOL BHULAIYAA 2). Below these fields are sections for 'Song File / Audio File' and 'Song Img', each with a 'Choose File' button and a 'No file chosen' status. The 'Current file' is 'Audio_Songs/Title Track Bhoool Bhulaiyaa 2 320 Kbps.mp3' and the 'Current img' is 'Audio_Songs/Images/TITLE TRACK- BHOOL BHULAIYAA 2.jpg'. At the bottom, there is a 'Category' section with radio buttons for 'Bollywood' (selected) and 'Hollywood', and an 'Update Audio' button.

Film Name BHOOL BHULAIYAA 2	Song Img Current img: Audio_Songs/Images/TITLE TRACK- BHOOL BHULAIYAA 2.jpg Choose File No file chosen
Category <input checked="" type="radio"/> Bollywood <input type="radio"/> Hollywood Update Audio	

- Clear fields for modifying the song's details, such as the title, artist, genre, release date, and other important information. The fields are easy to understand and fill out.
- Admins are to upload a new file for the song in case they need to replace the existing file.
- Admins to upload a new Image for the song in case they need to replace the existing file.

- Show the current details of the song in the modification page, making it easy for admins to compare and update the information.

Admin Page

Record Delete Confirm Modal Page

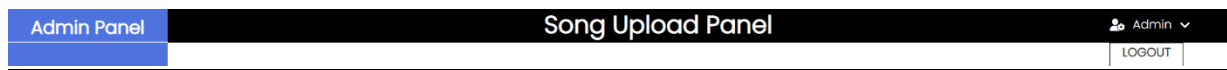

- Including a confirm modal page for deleting a song on the admin page is a great way to ensure that admins do not accidentally delete a song.
- Clear and concise messaging in the confirm modal page to ensure that admins understand the implications of deleting a song.
- Include a confirm button on the modal page, ensuring that admins must take an additional step

before deleting the song.

Admin Page

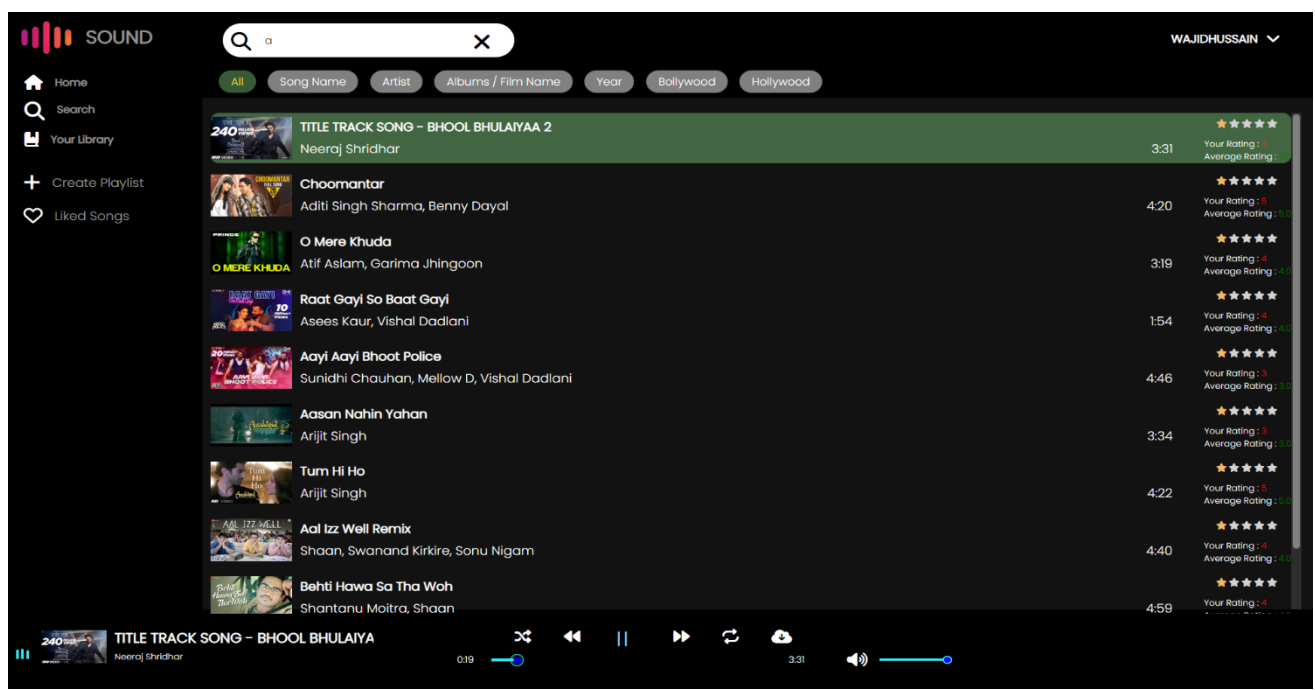

Admin Page Header with Logout Button

- Use a clear and concise label for the logout button, such as "Logout" or "Sign Out", to ensure that admins understand the purpose of the button.

User Page

User Main Page with Songs Along With Individual Song Ratings And Advanced Search Bar.

- This Section Display Website All Songs Along with There All Details with a Robust Rating System that allows users to rate songs on a scale. Displaying an aggregate rating next to each song

can help users quickly identify popular and well-reviewed songs.

- Allow users to sort the song list by rating, making it easy to find highly rated songs.
- Use an advanced search bar that allows users to search for songs based on a variety of criteria, such as artist, title, genre, and release date. Including autocomplete and filtering options can make the search process more efficient.
- Display relevant information about each song, such as the artist, album, and release date. Providing album artwork or a preview of the song can also enhance the user experience.
- The user main page is optimized for mobile devices, with a responsive design and touch-friendly controls.

User Page

Song Master Play

- Include play/pause, next, and previous buttons to give users full control over the playback of songs. These buttons should be easy to use and clearly labeled.
- Display relevant information about the currently playing song, such as the artist, album, and title. This can help users identify the song and appreciate its context.
